Endorsement® in Infant or Early Childhood Mental Health is cross-sector and multidisciplinary including professionals from children and/or human development, education, nursing, psychiatry, psychology, social work and others, working with or on behalf of children, birth through six, and their families.

Reflective Supervision/Consultation is a vital component of working with infants, young children, and their families. It provides space to examine the work with a supportive Infant Mental Health specialist and has been shown to support staff satisfaction and retention.
